You might not know, but books are quite important to all of us. When you read, you will discover new things all the time. There are a great variety of books in the world; there are fiction, non-fiction, novel, facts, drama, fairy-tale and a lot of others. People read them every day.

Which kinds of book do you like the most?

The book "Tales of a fourth grade nothing" is about a fourth-grader named Peter. It is written by Judy Blume. I believe you will find this book really fun to read as you will discover the troubles of having a young

brother. Peter talks about his brother Fudge, who is only two-and-a-half year old and is Peter's biggest problem. Fudge spoils everything for Peter and does bad things to him even it's not his intention to do so. For example, Peter has to stay home with Fudge when he could have gone to his friend's house; Fudge got himself hurt but Peter got blamed for it; Fudge destroyed the poster that Peter made for the school, and Fudge did something terrible to Peter's pet and ended up in hospital himself.

You may have had similar experience in your family situation. And even if you don't have a younger brother or sister, you will still find this book interesting to read as it will bring you a barrel of laughs. And for those who are presently burdened by a pesky little brother, this may be the book you are looking for.
