George's Marvellous Medicine by Roald Dahl

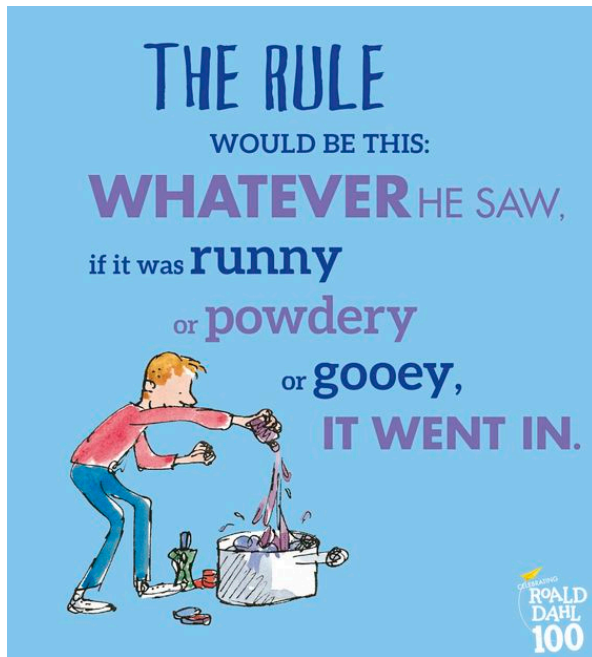

This marvelous story told us about George who was 8 years old, and his wish to change his grouchy old grandma.

George's Marvellous Medicine

followed a day in the life of George - the son of a farmer lived in the middle of no-where. There were no children to play with when he was not at school. George and his parents were living with grandma, who was nasty, cruel,

disrespectful, selfish, and grumpy, unlike most grandmas. If George's mum needed to go shopping - then it was George who had to take good care of her.

The most important thing he needed to do was to give her medicine at 11 o'clock sharp. This gave George a fantastic idea - to make grandma a new medicine - one that would hopefully change her into a much nicer person.

I highly recommend this book to everyone because it is amazing and well-written. The way the writer wrote was hilarious and he put in a lot of random funny things that might exist in real life.
